

Hunger Project

Our hunger project was on Saturday, 15 of December. We assembled in the class at our regular time and from there we went to our school's kitchen. Our teacher selected some students who opened muffins and gems.

Some poured chocolate spread, some did the sprinkles and some did the gems and also some

people put the muffins in the boxes. After doing all this we went to the stage and waited for the bus to come and around 9:30 we boarded the bus and went to rain basera

where the under-privileged people lived. When they saw our bus they were so excited as they knew that every time we come, we get some or the other thing for them .We told them to form a line and one after another they came and took the muffins which we had made .By looking at their faces we saw their joy and happiness. Then we went to another place and distributed muffins .We asked one boy if he liked the muffins more or the khichdi. He told us that khichdi is what they prefer because it is their basic requirement and muffins don't fill their stomach. To some people we asked how

long have they been living here for? To our surprise some people were living there for more than 40 years.

Facing problems, but now the government is giving them 2000 RS. Per month for their needs the children are going to

the school made by NDMC. They enjoyed the muffins. Then we came back to school. It was such a good experience helping the poor

people 😊
