

# MATHS HANDSON ACTIVITY

## CLASS IV

*“Math may not teach us how to add love or to subtract hate but it gives us hope that every problem has a solution.”*

The ones are on the right....

The tens are next in line.....

Move one more to the left.....

For the hundreds every time.....

The thousands are next in line...

To understand and develop the concept of place value, class 4 students engaged Class 3 students in a hands on activity. They thoroughly enjoyed giving answers to place value of digits in a number, reading the number, forming greater and smaller numbers, finding successor and predecessor to a number and much more. It was quite interesting to watch this interactive session with curious questions of class 3 students and the confident replies by class 4 students to clarify each concept.

The next activity was finding patterns in numbers and creating beautiful designs incorporating the concept of place value in a worksheet. Children of class 3 participated in the activity wholeheartedly.
